At the beginning of March, 600 troops with 12 ctillery pieces were said to have left the installations by road for orn. The following detailed observations were made:

Since shelter space for motor vehicle and heavy weapons was limited, the trucks of the installation were parked in the open. Squads of soldiers received rifle drill in the barracks yard. fifth gun of 37 mm caliber was being emplaced beside the four AA guns eviously observed at the railroad bridge across the Elbe River. Crews of our or five soldiers were with each gun. (5)	15
